### **Performance and Risks**

ACMI cannot and does not guarantee that customers will achieve their investment objectives, or that customers will not lose their entire investments. Securities markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities investments can involve greater risks than US investments, including interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. This can make emerging market securities more volatile and potentially less liquid than more developed markets. Debt securities offering higher yields generally carry more risk and lower quality.
